

Thirty Years of Trading Success in Your Pocket

Contrary Thinkers

%CC-VIX on Simplify Volatility Premium ETF (SVOL) to gauge the amount of fear and complacency by professional managers and traders.

SVOL seeks to provide investment results, before fees and expenses, that correspond to approximately one-fifth to three-tenths (-0.2x to -0.3x) the inverse of the performance of the Cboe Volatility Index (VIX) short-term futures index while also seeking to mitigate extreme volatility.

We believe many traditional sources of income are failing to meet investor needs in today's low yield environment. SVOL aims to provide an attractive income stream and source of diversification while seeking to avoid risks inherent in other income-producing asset classes.

The fund's short VIX position provides investors an optimized exposure for monetizing the premium in the VIX futures market. A modest option overlay budget is then deployed into VIX call options to help protect against adverse moves in VIX.

Country Thinking is about letting go of traditional ways of thinking, the commonplace that no longer serves you well in investing and trading. Building from the truth, from first principles the robust into anti-fragile. Thanks in advance for your consideration, I look ahead to working with you for the duration.

Fresh point of view, new tools, timely trading ideas.

Great and Many Thanks,

Jack F. Cahn, CMT
